

NEXGEN STUDIOS

The Last Brush LLC

Three-Page Static Website Proposal

Prepared by NexGen Studio • June 3, 2026

Custom design • Mobile responsive • SEO-friendly setup • Ownership transfer

A clean three-page website built to help customers understand the business and request an estimate.

n3xg3nstudio.com | anson@nexgenstudio.io | 970.909.4951

Quick Summary

The Last Brush LLC needs a clean, professional three-page website that gives potential customers a clear first impression, explains the painting services offered, and makes it easy to request an estimate. The goal is not to overbuild. The goal is to create a polished online presence that looks trustworthy, works well on phones, and gives the business full ownership after final payment.

Client Brief

Business	The Last Brush LLC
Industry / location	Painting company. Service area to be confirmed.
Main goal	A simple, professional site that explains the business, shows services, and helps visitors contact you.
Known scope	Three-page static website with custom design, mobile responsiveness, SEO-friendly setup, analytics, and ownership transfer.

Recommended Scope

I recommend a three-page static website built around the way painting customers usually make decisions: they want to know what services you offer, whether you look trustworthy, whether you serve their area, and how quickly they can request an estimate.

This build would include a custom homepage, an about/services page, and a contact page. The site would be designed around The Last Brush LLC's brand identity instead of using a generic pre-made template. It would also include basic search-engine-friendly structure, mobile responsiveness, a contact form, Google Analytics, and final ownership transfer after payment is complete.

Deliverables

Deliverable	What It Includes
Custom Design	A unique layout reflecting your brand identity instead of a pre-made template. Colors, fonts, and imagery tailored to your business.
Home Page	A high-impact landing page with clear calls to action and sections for services, testimonials, and contact details.
About / Services Page	Tells your story and mission and describes the services you offer.
Contact Page	A contact form, map, and social-media links so visitors can reach you easily.
Mobile Responsiveness	Looks and performs well on smartphones, tablets, and desktop computers.
Search-Engine Friendly Setup	Clean code and content structure, meta titles and descriptions, fast load times, and clean links so search engines understand your pages.
Basic Analytics	Google Analytics connected so you can see visitor statistics.
Ownership Transfer	On final payment, the domain and code are transferred to your name. You can move hosting at any time.

Page Plan

1. Home Page

- Hero section with business name, short value statement, and Request an Estimate button.
- Service overview for interior painting, exterior painting, touch-ups, staining, cabinet painting, or other services you confirm.
- Trust section for insured/licensed status, years of experience, warranty, reviews, or customer satisfaction promise if available.
- Testimonials or recent work preview if you have customer quotes or project photos.
- Contact call-to-action.

2. About / Services Page

- Short company story.
- Mission or service promise.
- List of painting services.
- Service area.
- Process overview: estimate, prep, paint, walkthrough, cleanup.
- Why customers should choose The Last Brush LLC.

3. Contact Page

- Contact form.
- Phone number and email.
- Map or service-area note.
- Social media links.
- Short note explaining what happens after the form is submitted.

Local Market Context

Painting-company websites in Greeley and Northern Colorado commonly lead with free estimates, interior/exterior services, service-area clarity, customer reviews, and trust signals.

- Eitel Painting in Greeley highlights interior/exterior painting, residential/commercial work, being insured, free estimates, and a satisfaction guarantee. Source: eitelpainting.com
- FDXPainting in Greeley highlights interior painting, exterior painting, staining, a free-estimate form, and locally owned positioning. Source: fdxpainting.com
- Alliance Painting emphasizes residential/commercial services, reviews, completed work, and no-obligation evaluations. Source: alliancepaintingco.com
- MGM Painting highlights free estimates, a satisfaction guarantee, BBB accreditation, color consultation, and review/trust signals. Source: mgmpaintingco.com/greeley
- True Peak Painting highlights interior painting, exterior painting, cabinet refinishing, personal service, and dependable communication. Source: truepeakpainting.com

For a new three-page site, the most important pieces are straightforward: the site needs to look professional, explain services clearly, show trust, work well on mobile, and make requesting an estimate easy.

Local web-design pricing varies widely. Public examples include simple local web packages around \$999-\$1,699, basic website packages around \$1,000, and more involved WordPress/custom packages around \$2,000-\$2,500+. Sources include Trailhead Web Design, iPoint Technologies, Designeo, Webapplify, and Boos Designs.

Why NexGen Studio

NexGen Studio is built for small businesses that need a site they can actually own and grow from. A basic template can work for a business that only needs a few pages, however this proposal gives The Last Brush LLC a custom foundation with clean design, mobile-first layout, contact flow, analytics, and ownership transfer.

The main difference is flexibility. If The Last Brush LLC later wants estimate request tracking, project photo galleries, customer review collection, quote forms, text follow-ups, or a small admin dashboard, the site can grow into that instead of being stuck inside a limited template.

Relevant Proof

- BuiltbyKiefer: live contractor website plus authenticated admin area, secure document workflows, and branded invoice PDF generation.
- InterlockGo NOCO: live service-business marketing site plus internal operations dashboard and technician app.

Timeline

Phase	Work	Estimated Timing
Discovery	Confirm services, service area, brand assets, photos, contact info, and preferred wording.	1 business day
Design	Homepage direction, color/font direction, layout, and content structure.	2-3 business days
Build	Build the three responsive pages, contact form, SEO basics, analytics, and deployment setup.	4-7 business days
Launch	Final testing, edits, DNS/hosting setup, and ownership transfer.	1-2 business days

Estimated total timeline: about 1-2 weeks after content and brand assets are provided.

Investment

Three-Page Static Website

- Best for: A painting company that needs a professional online presence without a large custom software build.
- Includes: custom design, home page, about/services page, contact page, mobile responsiveness, search-engine-friendly setup, basic analytics, and ownership transfer.

Investment: [Anson to confirm final price]

Optional Add-ons

- Project gallery.
- Service-area landing pages.
- Google Business Profile cleanup.
- Review/testimonial section.
- Estimate request workflow.
- Monthly hosting, edits, and maintenance.

What I Need From You

- Logo and brand colors, if available.
- Phone number, email, and preferred contact method.
- Service area.
- List of painting services offered.
- Photos of completed work, if available.
- Customer testimonials or reviews, if available.
- Any license, insurance, warranty, or satisfaction guarantee language you want included.
- Social media links.
- Domain name preference, if not already purchased.

Next Steps

If this direction looks right, the next step is to confirm the price, gather the logo/photos/contact details, and approve the page structure. Once those pieces are ready, I can start the design direction and build the first draft.
